

# P4C PROGRESS: Collaborative Thinkings

Collaborative Thinking is an important skill P4C helps you develop. Without strong Collaborative Thinking skills we will not be able to develop Critical and Creative Thinking skills so it is hugely important.

Have a look at the Blobs on the Blob Tree. Colour the Blob that you think best represents your contribution to our community of enquiry with regard to Collaborative Thinking.

Explain why you coloured the Blob you did? What evidence do you have to justify your choice?

What can you, or the community, do to improve this skill?

What might be difficult about this?
